

TESTING SEQUENTIAL ENDPOINT

Curl

```
curl -X 'GET' \
  'http://127.0.0.1:8000/sequential' \
  -H 'accept: */*'
```

Request URL

http://127.0.0.1:8000/sequential

Server response

Code Details

200

Response body

```
{
  "mode": "sequential",
  "results": [
    {
      "task": "Task 1",
      "delay": 2,
      "status": "completed"
    },
    {
      "task": "Task 2",
      "delay": 3,
      "status": "completed"
    },
    {
      "task": "Task 3",
      "delay": 1,
      "status": "completed"
    }
  ],
  "time_seconds": 6.06
}
```

Response headers

```
content-length: 300
content-type: application/json
date: Mon, 28 Sep 2026 11:57:33 GMT
server: uvicorn
```

TESTING CONCURRENT ENDPOINT

Curl

```
curl -X 'GET' \
  'http://127.0.0.1:8000/concurrent' \
  -H 'accept: */*'
```

Request URL

http://127.0.0.1:8000/concurrent

Server response

Code Details

200

Response body

```
{
  "mode": "concurrent",
  "results": [
    {
      "task": "Task 1",
      "delay": 2,
      "status": "completed"
    },
    {
      "task": "Task 2",
      "delay": 3,
      "status": "completed"
    },
    {
      "task": "Task 3",
      "delay": 1,
      "status": "completed"
    }
  ],
  "time_seconds": 3.02
}
```

Response headers

```
content-length: 280
content-type: application/json
date: Mon, 28 Sep 2026 12:00:15 GMT
server: uvicorn
```
